

Frankincense Resin Extract

(BOSWELLIA CARTERII)

For calm, supported, healthy-looking skin

Boswellic Acid

Frankincense comes from the Boswellia tree and contains a compound called Boswellic Acid. Once harvested, this compound can be concentrated into an extract powder for easier use and higher potency.

Why it matters for skin:

Your skin is constantly responding to stress,
irritation, and imbalance -
this is where supportive ingredients
make a difference

Frankincense is known for:

- Calming the look of redness
- Supporting a more even skin tone
- Helping skin feel balanced
- Healing blemishes and clearing acne
- Promoting a smoother appearance
